

Carbon Reduction Plan

Supplier name: EntServ UK Limited

Publication date: 30.11.22

Commitment to achieving Net Zero

EntServ UK Limited is committed to achieving Net Zero emissions by 2050 in the UK.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Baseline year emissions: April 2018 – March 2019	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	4,837
Scope 2	14,593
Scope 3 (4,5,6,7,9)	5,853
Total Emissions	25,283

Current Emissions Reporting

Reporting Year: 2022	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	2,962

Scope 2	3,167
Scope 3 (4,5,6,7,9)	4,375
Total Emissions	10,504

Emissions reduction targets

In order to continue our progress to achieving Net Zero the global parent company DXC Technology has adopted a carbon reduction target of 55% by FY25. EntServ UK Limited contributes to this target and we project that carbon emissions will decrease to 8,849 tCO₂e by FY25. This is a reduction of 65% compared with the baseline. This reduction is in excess of the ICT sectoral decarbonisation pathway from Science Based Target initiative to limit warming to 1.5°C. Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

The following environmental management measures and projects have been completed or implemented since the 2018-19 baseline. The cumulative carbon emission reduction achieved by these schemes and additional minor changes to date equates to 14,778 tCO₂e, a 58% reduction against the 2018-19 baseline and the measures will be in effect when performing the contract:

Emissions reduction scheme	Annual tCO ₂ e saving	% reduction against baseline
Operation of Data Centres, including site transformation programme and implementation of energy (ISO 50001) and environmental (ISO 14001) management systems.	7,928	32%
Procurement of renewable electricity across the site portfolio.	1,459	6%
Adopting a Virtual First approach: Reducing the property portfolio, encouraging flexible working for employees and cutting commuting emissions.	1,518	6%
Reduced business travel and use of fleet vehicles.	672	3%

In the future we plan to implement further measures such as:

- Further consolidation of office site portfolio
- Engagement with key suppliers to address emissions within the value chain
- Circular economy approach to reduce waste.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

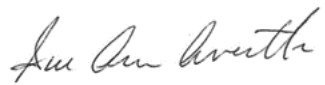

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
