DXC CERTIFICATIONS

DXC uses and continuously improves its global quality and security processes, ensuring consistency of approach and the deployment of a standard global process set to all our customers as applicable.

DXC Technology boasts a proud history of innovation, service and value, and a long-standing commitment to standards, models and frameworks — a commitment that began over three decades ago with our first certification in ISO 9001 (Quality Management).

As certification programs have continued to expand, we have built an Integrated Management System (IMS) that supports multiple standards, models and frameworks such as ISO 9001 (Quality Management), ISO 14001 (Environmental Management), ISO 20000 (Service Management), ISO 22301 (Business Continuity Management), ISO 27001 (Information Security Management), ISO 27701 (Privacy Information Management), as well as ISO 27017/27018 (Information Security Controls for Cloud Services), ISO 45001 (Health and Safety Management), ISO 50001 (Energy Management), SA 8000 (Social Accountability), ISO 13485 (Quality Management in Medical), TISAX, CMMI-DEV, and CMMI-SVC.

DXC has nearly 350 sites in 50 countries around the world that are certified to one or more of the above standards. Our certifications apply to a broad and diverse range of industries including automotive, financial services, insurance, life sciences, retail, healthcare, utilities, manufacturing, mining, public sector, technology, digital, transportation, engineering, media and communications.

Our Delivery Excellence/Quality Certifications and Standards team is dedicated to one mission: to meet our customers' exacting expectations for standards in terms of service, quality and consistency. To maintain our high-quality standards, we leverage our global team of dedicated subject matter experts' vast knowledge base of standards, models and frameworks — ensuring that the program continues to be impartial, commercially relevant and continually improving. Lloyd's Register (LR) reinforces our efforts by annually conducting a comprehensive, worldwide program of independent external assessments to ensure that our certifications are maintained and renewed as necessary.

Our greenhouse gas data collection and reporting approach are externally assured in accordance with ISO 14064-3:2006. External verification is provided by Lloyd's Register.

DXC's commitment to quality is evidenced in the way that we have implemented standards, models and frameworks to demonstrate our service delivery capabilities. DXC customers gain confidence from our certification and assurance programs, which have fueled excellence in our service delivery for our customers.
