

**DXC Environment,
Social and
Governance Strategy**

DXC environment, social and governance strategy

With a focus on our customers, colleagues, and communities, DXC is committed to building sustainable and responsible business practices that create value for all our stakeholders and contribute to a better world. Our focus on ESG aligns with our Essential Evolution; we provide the services that the largest companies in the world cannot live without, and we guide our customers to their technology future because they place their trust in us.

Environmental

Advancing the sustainability of our operations and IT services while helping our customers become more sustainable

Social

Building a diverse, inclusive, values-based, and people-first culture based on equitable practices, employee perspectives, and community stewardship

Governance

Instilling trust and garnering respect among the stakeholders we serve through **transparent leadership**, to drive sustainable growth

ESG strategy and targets

As a responsible corporate citizen with a commitment to environmental sustainability, we set ambitious carbon-reduction goals, and are working toward circular-economy processes and climate impact mitigation. Our sustainability approach is targeted to (1) advance the sustainability of our operations; (2) advance the sustainability of our IT services; and (3) use our technologies and capabilities to help our customers become more sustainable.

We strive to minimize our impact on the environment and improve resource efficiency in the areas of energy consumption, data center management, and travel and transportation. Our conservation efforts are supported in part by our shift to a virtual-first operating model, which enables our workforce to be largely remote and helps us reduce our greenhouse gas emissions and our overall energy consumption. While the virtual-first model mainly helps reduce the size of our office footprint, we are also pursuing efficiency programs for data centers and data center rationalization programs to reduce energy consumption.

DXC also partners with customers to help them achieve their own climate-related goals. In response to shifting customer demand, we offer a number of products and services that can have a significant impact on our customers' sustainability objectives, delivering climate-related benefits far greater than what we could achieve alone through our internal carbon-reduction efforts. Offerings such as DXC Modern Workplace, cloud migration services, and data-driven sustainability services provide the data insights and IT evolution to directly reduce carbon emissions for our customers.¹

¹ The information in this section is based in part on data provided to us by our customers. We do not, and do not intend to, independently verify such information or claims.

Environmental

DXC has committed to set near-term company-wide emission reductions in line with the Science Based Targets initiative (SBTi). Additional targets include reducing Scope 1 and 2 emissions 65% by 2030 against a 2019 baseline.

Achievements include:

- 58% reduction in Scope 1 & 2 greenhouse gas emissions in FY23 from a FY19 baseline, exceeding our FY22 target
- 44% reduction in energy consumption in FY23 from a FY19 baseline
- 38% of electricity procured from renewable sources
- Recycled 99% of the e-waste processed through our recycling and refurbishment partners

Social

We are committed to building a diverse, inclusive, values-based, and people-first culture to enable our Essential Evolution. Diversity is at the core of our ability to serve our customers and stockholders, and it strengthens our reputation as an employer of choice in the technology services industry and beyond.

Achievements include:

- Established 20 Employee Resource Groups to cultivate diversity
- Partnering with cultural groups to increase diverse hiring
- Expanded career development programs for women
- Improving equity of employee benefits offerings
- Employees completed 4.7M training hours in FY23 via DXC Learning platform
- Donated \$6M to more than 1,000 global causes

Governance

DXC's governance program is being structured to instill trust and garner respect among the stakeholders we serve through responsible and transparent leadership. Our Board devotes significant time and attention to ESG issues, inclusive of Information Security Risk and Ethics & Compliance to maintain the highest standards of corporate governance.

Achievements include:

- Experienced and engaged Board of Directors and key committees
- 45% of director nominees from underrepresented social groups and 27% of director nominees are female
- Robust ethics program with proactive audit and risk assessments
- Continual investment in information security and data privacy to aggressively maintain best-in-class assurances

ESG oversight

The governance of DXC's ESG program is a multitiered process involving the Board of Directors, members of our executive staff, and internal leadership.

- Our Board of Directors provides oversight of our ESG program, enabling us to have the governance, long-term strategy, and processes to manage ESG outcomes and meet the needs of our stakeholders.
- The Nominating and Corporate Governance Committee of our Board of Directors has specific oversight of ESG.
- Our ESG leadership team updates the committee on ESG status quarterly and provides an update to the full board annually.

Reporting frameworks
