Reimagine insurance business processes
Reduce technology risk
Rediscover business value

aws | DXC TECHNOLOGY

Reimagine business processes

- **Personalize** products and offer touchless services at scale that deliver broader, richer, lasting relationships with your customers

- **Tailor** to your customers' exact needs with meaningful in-person, virtual, and digital customer interactions

- **Deepen** customer experiences with a portfolio of self-service options to help them learn and discover new products and services and consult with product experts

- **Deliver** streamlined operations that make it easier for your customers to submit claims, and for your claims departments to manage them

PROOF POINT:

Goodville Mutual Casualty Company is deploying DXC Assure Claims built on AWS to deliver digitally enabled user experiences

Goodville Mutual Casualty Company

Reduce technology risk

- **Shed** legacy infrastructure and technical debt. Transition to a powerful digital platform that connects with your customers and offers differentiated experiences, features, and value

- **Gain** the secure, resilient global infrastructure, cloud services, and platform expertise to accelerate release cycles, improve decision-making, reduce costs, risk, and streamline operations

- **Leverage** DXC's industrialized migration factory process to perform migrations at scale using DXC intellectual property, Amazon Web Services (AWS) CloudEndure, and other specialized migration tools

- **Integrate** AWS services, security, and compliance best practices seamlessly with the DXC Assure Digital Platform, an AWS cloud-native offering

PROOF POINT:

MassMutual gains speed and agility by moving existing insurance applications from mainframe to the AWS cloud

MassMutual

Rediscover business value

- **Deliver** innovative products and services that meet rapidly changing consumer behaviors and expectations – and drive rapid growth

- **Optimize** data lakes and analytics in the cloud for quick and insightful analysis, eliminating the need to maintain expensive data warehouses

- **Economize** and scale when building new solutions and services with DXC Technology Developer Central and Marketplace, a rich repository of tools, application programming interfaces (APIs), services, and insurtech innovation

- **Leverage** DXC and AWS services and tools to collect, store, and analyze customer data and build innovative customer-facing channels

PROOF POINT:

The Black Car Fund can now generate reports in five minutes – a task that used to take a least a week with manual processes

Black Car Fund

Strategic Partnership

As an AWS Premier Consulting and Financial Services Competency Partner, DXC Technology brings deep insurance domain experience, intellectual property, next-generation technology, and system integration expertise.

DXC understands the complexities and challenges of migrating legacy applications and business processes to the cloud. AWS provides insurers with the secure, resilient global cloud infrastructure and services they need to differentiate themselves today and adapt to the needs of tomorrow.

Together, DXC and AWS have proven insurance industry experience helping insurers improve customer experience, reduce risk and cost, optimize existing IT, transform apps to a secure cloud environment, and operate with speed and resilience.
