

DXC Assure Legal Insights

DXC Assure Legal Insights offers new ways to mitigate risk and control costs by combining a flexible, easy-to-use legal spend benchmarking tool with complete, straightforward judicial analytics covering state and local jurisdictions. DXC Assure Legal Insights combines the power of litigation analytics with cost data and legal fee benchmarking.

The business case

Claims and risk management executives are under increasing pressure to manage expenses and lower legal fees while identifying and mitigating litigation and related risks.

To do this, they need technology that can analyze data to further understand their costs while finding ways to reduce risks that can affect the bottom line.

They need to identify ways to:

- Leverage technologies and data platforms to better manage legal risks, drive efficiencies and lower costs
- Partner with the most effective law firms to deliver enhanced legal services
- Drive standardization of legal services

External legal services, procurement costs and overall litigation management costs continue to rise.

Now, with DXC Assure Legal Insights, every claims and risk management professional, general counsel and trial lawyer can access empirical data on litigation outcomes and costs. No more guessing, speculating or hoping you're right about whether to try or settle a lawsuit. DXC Assure Legal Insights provides access to data that users

can rely on to manage litigation while reducing litigation costs.

Some offerings provide insight into litigation costs only. Others provide insight into court outcomes. Only DXC Technology brings both insights together into one powerful, easy-to-use data platform. Combine these insights with DXC's legal fee and rate benchmarking database, which consists of millions of billed hours and billions in legal fees paid, and you have all the data you need to deliver better, faster and cost-effective legal services to your organization.

With DXC Assure Legal Insights, claims teams have the data to make better decisions about when, where and how to try cases. Legal teams can now easily analyze how a litigation matter could potentially unfold, how long it may take and what it will likely cost. With robust data, users can evaluate litigation outcomes and costs with an interactive tool showing information based on varying jurisdictions, courts and even selected plaintiff and defendant counsel. Users can also access comparative insights into timekeeper rates by title, case type, jurisdiction and litigation phase and task code.

Key benefits

- Combines legal spend metrics with judicial analytics to help reduce litigation risks and costs
- Compares legal spend data with industry benchmarking data to see where users stand against their peers
- Renders intuitive visual graphics to allow users to drill down to critical information in order to take appropriate action
- Provides in-depth coverage of select case types before state and local jurisdictions and judges, allowing users to see who their best attorneys are
- Allows for critical business decisions by calculating average days to litigate, costs and panel counsel rates by case type and venue
- Reports empirical data on case outcomes (win-loss) by jurisdiction, judge and counsel, helping users decide whether to try, settle or choose a different attorney

DXC Assure Legal Insights combines benchmarking and judicial analytics, which makes it unique for helping identify and analyze litigation risk and costs.

DXC Assure Legal Insights in action

DXC Assure Legal Insights maintains an expansive and secure data warehouse of insurance carrier data on legal spend. With its intuitive interface, users can easily compare legal spending with more than 5 years of insurance carrier data. Users can also analyze federal, state, local court and case data to determine the average case length, cost and success probability.

Claims and risk managers can:

- Analyze the amount spent on law firms, case types, timekeepers and litigation tasks and compare them to peers' aggregated claims and invoices by state and county jurisdiction
- View the win-loss record of top outside counsel litigating select case types before judges in state and local jurisdictions
- Identify opportunities to reduce legal spending by case type, timekeeper and litigation task
- Compare timekeeper rates across states, lines of business, case types

and litigation tasks to determine whether the rates you pay timekeepers are above, consistent with or below the aggregated rates of industry peers

- Manage law firm projections of the average days to litigate case types, average costs and the average panel counsel rate by state and local jurisdiction
- View empirical data on the tendency for success of litigating case types before judges in select state and local jurisdictions

Why DXC?

DXC Assure Legal Insights provides users with empirical data to see the interaction between litigation risk and cost. Claims and risk management teams must identify and mitigate litigation risk while projecting and reducing costs. While other tools deal with risk and costs separately, only DXC Assure Legal Insights offers both insights in an intuitive, straightforward user experience. Legal teams can analyze matter duration and costs, and how changes in jurisdiction, judge and outside counsel affect outcomes.
